KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: The fund invests in short term domestic fixed income securities, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. Factors/events that may lead to a rise in interest rates include adverse market conditions, issuer-specific factors/events and/or negative developments in domestic political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the Fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Credit/ Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt securities issued by related parties, as well as the execution of trade transactions with related counterparties.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The BPI Money Market Index returned -0.04% in July, while benchmark short-term government yields rose 61 basis points (bps) on average. Average daily trading volume rose to PHP14.95bn from June's PHP8.35bn with trades mostly seen on the belly (5-year and 10-year papers) of the curve.

The Bureau of the Treasury (BTr) held four Treasury Bill auctions in July. Average rates for the last awarded auction of the 91-day paper, 182-day paper and 364-day paper were at 2.273%, 3.143% and 3.356%. Awarded yields for Treasury Bills have been elevated given rate hike expectations as inflation continues to trend higher. Towards month-end, the BTr released its August auction schedule, announcing four FXTN issuances (3.5-, 7-, 10-, and 5.5-year tenors) and five Treasury Bill auctions.

In the local economic space, June inflation rose by 6.1% year-on-year, the fastest pace since November 2018. This was on the back of rising food and fuel costs, as geopolitical tensions continue to keep oil prices elevated. Consequently, the BSP surprised markets, raising policy rates mid-month by 75 basis points to 3.25%. This was the largest single rate hike in history and was also the first off-cycle move since the pandemic began in 2020. The central bank will continue to monitor economic data and adjust policy settings as needed.

Fund Performance. The Fund returned 0.07% during the month, behind benchmark by 5 bps. Meanwhile, the YTD performance of the Fund reported a gain of 0.33%, underperforming the benchmark by 27 bps.

Fund Strategy. The Fund favors the safety of Time Deposits. Expectations of rising rates moving forward may provide an opportunity for better yielding investment outlets.
