

AYALA PLANS, INC.
A subsidiary of the Bank of the Philippine Islands

AYALA PLANS, INC.
2023 Sustainability Report

Ayala Plans (AP) saw another banner year in 2023 with the continued delivery of its commitments to Planholders. AP paid over Php 111 million in Education benefits and Php 305 million in Pension benefits, showing the strength and circumspect management of its operations and most importantly its Trust Fund.

AP fully supports the sustainability efforts of its Parent company, Bank of the Philippine Islands (the “Bank”), in giving decent work to its employees while fostering gender equality among its ranks. AP has also worked towards implementing resource efficiency initiatives, providing Planholders and clients alternative methods of claiming benefits through the Bank's various remittance facilities to reduce foot traffic and paper consumption in the BPI branches.

Ayala Plans will continue to improve its operations and to adhere to the United Nation Sustainable Development Goals, to help provide decent quality of life to its Planholders, Nominees, and Stakeholders alike.

AP also ended the year 2023 with yet again 100% compliance to the requirements of all its governing regulatory bodies.
