**KEY RISKS AND RISK MANAGEMENT**

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

**Equity Price Risk:** The Fund invests in a concentrated portfolio of stocks listed in the Philippine Stock Exchange, exposing investors to potentially larger losses from a decline in stock prices, compared to funds tracking the index or employing a value style bias/ strategy. Decline in stock prices may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.

**Liquidity Risk:** Investors are exposed to the risk of loss due to the Fund's inability to convert equity holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

**Related Party Risk:** Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.

The Fund's investment outlets undergo proper screening and evaluation in accordance with the Trustee's accreditation process and minimum regulatory requirements. Regulatory exposure limits and asset allocation ranges as provided in the Fund's Plan Rules are strictly adhered to and monitored on a regular basis. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

## OUTLOOK AND STRATEGY

**Market Review.** The Philippine Stock Exchange just experienced its largest monthly drop thus far in 2022 on a confluence of external and internal factors. Ongoing geopolitical tensions between Russia and Ukraine, US Federal Reserve well-anticipated rate-hike, rising commodity prices and China's lockdown to curb the rising COVID-19 cases, forced market investors to pull out on risky assets and stay on the sidelines. On the domestic front, the BSP hinted at raising policy rates if GDP grows around 6-7%. Moreover, all eyes on the 2022 national elections as new leaders will take the helm for the next 6 years. The local bell-weather index gave up 6.6% month-on-month to close at 6,731.25 in April.

We saw lackluster activity as Average Daily Turnover registered at US\$102.61 million in April or 37.4% lower in the prior month. On foreign flows, we saw another round of Net Outflows at US\$99 million. These were across the board which could have recorded at US\$154.8 if not for the AREIT overnight secondary share placement at US\$55.8 million inflows. Year-to-date, Net Foreign Outflows expanded to US\$219 million.

As for the individual stock performances, top contributors in April were EMP (+39.1%), WLCON (+3.7%) and TEL (+0.86%) while the laggards include ACEN (-17.30%), URC (-15.29%) and AEV (-14.96%).

**Fund Performance.** The Fund registered a loss of 6.87% in April, underperforming its benchmark by 31 bps. Meanwhile, the YTD performance of the Fund reported a loss of 4.67%, outperforming its benchmark by 82 bps.

**Fund Strategy.** We will stay on the sidelines pending a domestic rate hike, elevated global commodity prices and other financial shocks from Europe. Moreover, we continue to be nimble and ready for any tactical opportunities.
