OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index rose 1.49% in May as the local yield curve fell by 22.28 basis points (bps) on average. Average daily trading volume for the month amounted to Ph23.86billion, higher than April's Ph14.73 billion with trades mostly seen on the short-end of the curve.

The Bureau of the Treasury (BTr) held four FXTN auctions in May. The 10-year FXTN 10-72 and 25-year FXTN 20-23 were fully awarded at average yields of 6.825% and 6.950%, respectively. Meanwhile, the new 20-year issuance, FXTN 20-27, was only partially awarded and priced at a coupon of 6.875%. The final bond auction for the month was FXTN 3-30, fully awarded at an average rate of 6.347%. Demand was generally healthy for the bonds issued throughout the month.

In the local space, April headline inflation rose by 3.8% year-on-year from the previous month's 3.7%. Food, transport, and restaurants were the main driver of inflation, though the increase in rice prices slowed for the first time in six months. Nonetheless, the inflation print remained within the central bank's 2 to 4% target range. The country's economy grew by 5.7% year-on-year for the first quarter of 2024, lower than consensus estimate of 5.9%. While net exports contributed positively for the period, other sectors such as private consumption and government spending appeared to be slowing. The first quarter GDP growth figure falls short of the government's official target of 6-7% for the year.

Fund Performance. The Fund continued to track the returns and duration of the iBoxx ABF Philippines. The Fund returned 1.58% for the month, closely tracking the benchmark index.

Fund Strategy. The iBoxx index will see minimal changes for the month. The Fund will rebalance to reflect any changes to continue to closely track the duration of its benchmark.
