## OUTLOOK AND STRATEGY

### Market Review.

The BPI Government Bond Index returned -0.23% in November as Philippine government bond yields rose by an average of 24 basis points (bps). Average daily trading volume for the month reached Php36.1 billion, lower than Php39.5 billion in October, with most trades concentrated in 5-year followed by 1-year papers. Despite the lower average trading volume, foreign investors' fixed income volume was net buying for the month compared to previous month's net selling.

The Bureau of the Treasury (BTr) held two FXTN auctions in November, offering the 5-, and 20-year tenors. FXTNs 20-27 (20-year) and 7-67 (5-year) were fully awarded at average yields of 6.095% and 5.954%, respectively.

Locally, October headline inflation rose to 2.3% year-on-year (YoY) from 1.9% YoY in September, well within Bangko Sentral ng Pilipinas' (BSP) forecast range of 2.0% to 2.8% for the month. The pick-up in inflation was driven mainly by faster food inflation due to adverse weather conditions for the month and tapering of favorable base effects from last year. Rice inflation in October also accelerated by 9.6% YoY from September's 5.7% YoY, breaking its 6-month deceleration streak. The reversal of the course due to year-on year base effects as rice inflation slowed in 2023 after the government implemented a rice price ceiling shortly last year.

The Philippine Stock Exchange Index (PSEi) fell in November amid large foreign selling following the outcome of the US Presidential Elections. The Donald Trump 2.0 is perceived to strengthen the U.S Dollar which negatively affect emerging markets. The Philippine Peso depreciated to Php59 level during the month. Moreover, the local 3Q 2024 GDP failed to improve market sentiment as it came out at 5.2%, lower than 5.7% consensus estimate.

The Average Daily Turnover improved to Php5.275 billion or 5.5% higher month-on-month in November. Meanwhile, in terms of foreign activity, foreigners adopted a risk-off stance which bucked the trend of 4 consecutive months net foreign buying. Foreigners sold off US\$349 million for the month which brought their year-to-date flows to US\$305 million net outflow. Their top sold stocks were ICT (-US\$ 71.8 million), ALI (-US\$ 62 million) and BPI (-US\$ 33.8 million). Foreign participation improved to 52%.

On a per stock basis, the top three index gainers for the month include: CNVRG (+1.86%), BDO (+1.11%) and MBT (+0.33%). Meanwhile, the bottom three performers include: BLOOM (-28.83%), ACEN (-19.92%) and WLCON (-19.25%).

**Fund Performance.** The fund returned -3.43% in November, outperforming the benchmark by 36 basis points. Year-to-date, the Fund registered a gain of 4.80%, above the benchmark by 100 basis points.

**Fund Strategy.** The Fund will accumulate on market dips as volatility from the upcoming Trump 2.0, geopolitical risks coupled with thin market liquidity continue to persist. The Fund's preference is for companies with leading market capitalization and good fundamentals as well as defensive and high-yielding stocks.

For the fixed income portion of the fund, the Fund looks to maintain its position in long-term bonds as interest rates are expected to decline in the second half of the year. Investors in a balanced fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
