## OUTLOOK AND STRATEGY

### Market Review.

The BPI Government Bond Index rose 0.68% in June as the local yield curve fell by 6 basis points (bps) on average. Average daily trading volume for the month amounted to Php20.86 billion, lower than May's Php23.86 billion with trades mostly seen on the belly of the curve.

The Bureau of the Treasury (BTr) held four FXTN auctions in June. The 7-year FXTN 20-17 and 20-year FXTN 20-27 re-issuances were fully awarded at average yields of 6.624% and 6.860%, respectively. Meanwhile, the 10-year FXTN 10-72 and 15-year FXTN 20-23 re-issuances, were partially awarded at average yields of 6.754% and 6.781%, respectively. The Bureau of Treasury (BTr) announced its borrowing program for the third quarter of 2024, with weekly Treasury bill offers increased to PHP 20 billion. The BTr plans to issue more tenors for the quarter, offering PHP 30 billion each for the 3-, 5-, 7-, and 10- year papers while the 14- and 20-year Treasury bond offers were reduced to PHP 25 billion.

In the local space, May headline inflation accelerated for the fourth straight month by 3.9% year-on-year from the previous month's 3.8%. The main drivers of inflation included housing, water, electricity, and gas while rice prices saw a deceleration from the previous figure of 23.9% to 23%. In an effort to curb elevated rice prices, the National Economic Development Authority (NEDA) Board approved the new Comprehensive tariff program which reduces tariff rates for rice imports alongside other essential commodities effective until 2028. The Bangko Sentral ng Pilipinas (BSP) held its policy rate steady at 6.5% during their Monetary Board meeting in June. Despite the weakening Peso, BSP Governor Eli Remolona had dovish remarks on the possibility of an August rate cut, which is ahead of the market expectations of the Federal Reserve to begin easing in September. The BSP revised both its 2024 and 2025 inflation forecast to 3.1% from 3.8% and 3.7%, respectively.

The Philippine Stock Exchange Index (PSEi) went narrowly down for the month of June. Market sentiment was weak due to the depreciation of the Philippine Peso when it hovered near the Php59 level. In addition, the FTSE rebalancing related activity further pulled the local bourse to the year-low of 6,158.58. However, the market bounced towards the latter part of the month on bargain hunting as investors digested BSP Governor's dovish rhetoric and lower inflation outlook. The PSEi closed at 6,411.91 or 0.3% lower month-on-month in June.

Trading activity was subdued for the month. Average Daily Turnover only recorded at Php4.4 billion. Meanwhile, foreign activity continued to register net outflows at US\$104 million for June. Index proxies SM and AC both recorded the biggest outflow as market sentiment remained weak. Foreign participation improved from 46% to 48% for the month

On a per name basis, the top three index gainers for the month were: AEV(+10.70%), MBT (+8.86%) and ALI (+8.57%). Meanwhile, the bottom three performers include: MONDE (-16.07%), JGS (-15.97%) and CNPF (-14.27%).

**Fund Performance.** The fund returned 0.49% in June, outperforming the benchmark by 34 bps. Year-to-date, the Fund registered a gain of 0.89%, behind the benchmark by 27 bps.

**Fund Strategy.** The Fund will retain its defensive position as inflation and geopolitical risks remain coupled with thin market liquidity. The Fund's preference is still for companies with leading market capitalization and good fundamentals as well as dividend paying stocks.

For the fixed income portion of the fund, the Fund looks to maintain its position in long-term bonds as interest rates are expected to decline in the second half of the year. Investors in a balanced fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
