INVESTMENT OBJECTIVE AND STRATEGY

The Fund intends to achieve long term capital growth derived from a diversified portfolio of equity and fixed income securities. The Fund aims to provide absolute returns in excess of the return of the composite benchmark, 90% BPI Philippine Government Bond 1-3 Year Index and 10% Philippine Stock Exchange Index(PSEi), net of tax.

CLIENT SUITABILITY

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The BPI Bayanihan Balanced Fund is suitable for investors who:

- Are at least classified as moderately aggressive based on their risk profile
- Have an investment horizon of more than five (5) years

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: Investors are exposed to adverse changes in the prices of domestic fixed income securities due to a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions.

Equity Price Risk: Investors are exposed to adverse changes in the prices of stocks listed in the Philippine Stock Exchange, which may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the fund's inability to convert fixed income and equity security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt and equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.

Credit/ Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks

OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index rose by 0.72% in August as Philippine government bond yields decreased by an average of seven basis points (bps). Average daily trading volume for the month reached Php41.3 billion, up from Php34.5 billion in July, with most trades concentrated in 5- to 10-year securities. The Bureau of the Treasury (BTr) held four FXTN auctions in August, fully awarding the 5-, 7-, 15-, and 20-year tenors. Auction highs generally aligned with, or came in slightly below, secondary market bids at the time, with the BTr awarding at 6.128%, 6.14%, 6.125%, and 6.22%, respectively.

On the domestic front, July headline inflation accelerated to 4.4% from 3.7% in June, exceeding economists' median estimate of 4.0%. The higher-than-expected inflation was driven mainly by increases in housing & utilities (2.3% vs 0.1% in June), education (5.8% vs 3.8%), transport (3.6% vs 3.1%), and food & non-alcoholic beverages (6.4% vs 6.1%). Despite the inflationary pressure, the BSP cut rates by 25 bps in August, marking the first reduction in four years. Economists forecast that inflation may have cooled to 3.7% in August.

Internationally, US inflation decelerated from 3.0% in June to 2.9% in July, slightly below the 3.0% expectation. US Federal Reserve officials highlighted the ongoing moderation in inflation and slowing economic data, supporting the case for eventual policy rate cuts.

The Philippine Stock Exchange Index (PSEi) rallied for the 2nd consecutive month as investors cheered the Bangko Sentral ng Pilipinas' (BSP) decision to cut policy rate by 25 basis points to 6.25%. The local bourse was further buoyed by growing optimism that US Federal Reserve's (The Fed) will likely reduce rates in September. Market sentiment was also supported by improving GDP number and peso rebound. GDP grew by 6.3% year-on-year in 2Q2024 from 5.8% in 1Q2024 propelled by government spending which rose by 10.7% while the Philippine peso strengthened to Php56.15 or 3.98% on a month-on-month basis. The PSEi moved up 4.2% month-on-month to 6,897.54.

For trading activity, the market's daily value turnover improved to Php5.66 billion in August from Php4.35 billion recorded in the prior month. MSCI rebalancing which occurred at the end of the month helped spur market's turnover. In terms of foreign activity, foreign buying was sustained for another month, notching US\$143 million. Top foreign bought stocks were ALI (+US\$40 million), BDO (US\$32.6 million) and ICT (US\$17.6 million). Foreign participation rose to 56%.

On a per stock basis, the top three index gainers for the month included: CNVRG (+29.98%), ALI (+19.66%) and JFC (+12.96%). Meanwhile, the bottom three performers were: URC (-23.53%), JGS (-15.47%) and AEV (-6.35%).

Fund Performance. The fund returned 0.64% in August, behind the benchmark by 14 bps. Year-to-date, the Fund registered a gain of 3.60%, behind the benchmark by 13 bps.

Fund Strategy. The Fund looks to gradually increase its duration position as interest rates are expected to fall towards year-end. While inflation has settled within the BSP's target in the past months, upside risks are still present. The BSP has already decreased its policy rates by 25 basis points to 6.25%. The central bank remains vigilant in monitoring inflation figures before easing rates further. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.

For equities: The Fund will accumulate on market dips as volatility from geopolitical risks coupled with thin market liquidity remain. The Fund's preference is still for companies with leading market capitalization and good fundamentals as well as dividend paying stocks.
