A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The BPI Bayanihan Balanced Fund is suitable for investors who:

- Are at least classified as moderately aggressive based on their risk profile
- Have an investment horizon of more than five (5) years

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: Investors are exposed to adverse changes in the prices of domestic fixed income securities due to a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions.

Equity Price Risk: Investors are exposed to adverse changes in the prices of stocks listed in the Philippine Stock Exchange, which may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the fund's inability to convert fixed income and equity security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt and equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.

Credit/ Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks

OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index rose 1.49% in May as the local yield curve fell by 22.28 basis points (bps) on average. Average daily trading volume for the month amounted to Php23.86 billion, higher than April's Php14.73 billion with trades mostly seen on the short-end of the curve.

The Bureau of the Treasury (BTr) held four FXTN auctions in May. The 10-year FXTN 10-72 and 25-year FXTN 20-23 were fully awarded at average yields of 6.825% and 6.950%, respectively. Meanwhile, the new 20-year issuance, FXTN 20-27, was only partially awarded and priced at a coupon of 6.875%. The final bond auction for the month was FXTN 3-30, fully awarded at an average rate of 6.347%. Demand was generally healthy for the bonds issued throughout the month.

In the local space, April headline inflation rose by 3.8% year-on-year from the previous month's 3.7%. Food, transport, and restaurants were the main driver of inflation, though the increase in rice prices slowed for the first time in six months. Nonetheless, the inflation print remained within the central bank's 2 to 4% target range. The country's economy grew by 5.7% year-on-year for the first quarter of 2024, lower than consensus estimate of 5.9%. While net exports contributed positively for the period, other sectors such as private consumption and government spending appeared to be slowing. The first quarter GDP growth figure falls short of the government's official target of 6-7% for the year.

The Philippine Stock Exchange sharply dropped for the month on large foreign selling. Market sentiment went down largely due to the depreciation of the local currency when it traded north of Php58 against the dollar. This was mostly driven by a strong dollar after the US Federal Reserve (The Fed), according to the FOMC minutes of the meeting, said they may consider pushing back the rate cut amid growing inflation concerns. Moreover, MSCI rebalancing further added to the volatility of the market where the Philippines was estimated to have a US\$100-120-million worth of outflow. The PSEI closed the month of May at 6,433.10 or 3.99% lower on a month-on-month basis.

Trading activity improved mostly due to the MSCI rebalancing. Average Daily Turnover registered at Php7.6 billion. Meanwhile, foreigners continued to be big sellers at US\$174 million recorded in May. MSCI related name – AEV, was the top sold name after its deletion in the Standard Index. Property names were also sold heavily, while telecommunications were top foreign bought names. Consumer names, on the other hand, were mixed. Foreign participation declined to 46%.

On a per name basis, the top three index gainers for the month include: WLCON (+19.76%), ACEN (+15.66%) and CNVRG (+14.47%). Meanwhile, the bottom three performers were: AEV (-16.55%), BDO (-12.28%) and MBT (-11.36%).

Fund Performance. The fund returned 0.49% in May, above the benchmark by 14 bps. Year-to-date, the Fund registered a gain of 1.29%, behind the benchmark by 13 bps.

Fund Strategy. The Fund looks to maintain its current duration position as interest rates are expected to stabilize over the medium term. It will likewise continue to hold high quality corporate bonds for yield enhancement. While inflation has settled within the BSP's target in the past months, upside risks are still present. The BSP remains vigilant in monitoring supply side pressures and potential second-round effects. The central bank signalled that it is waiting for inflation rates to fall comfortably within the 2-4% target before cutting policy rates. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.

For equities: The Fund will continue to be defensive, but also opportunistic, as volatility could persist given thin market liquidity and inflation risk is still on the upside. The Fund will focus on companies with leading market capitalization and good fundamentals.
