INVESTMENT OBJECTIVE AND STRATEGY

The Fund intends to achieve long term capital growth derived from a diversified portfolio of equity and fixed income securities. The Fund aims to provide absolute returns in excess of the return of the composite benchmark, 90% BPI Philippine Government Bond 1-3 Year Index and 10% Philippine Stock Exchange Index(PSEi), net of tax.

CLIENT SUITABILITY

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The BPI Bayanihan Balanced Fund is suitable for investors who:

- Are at least classified as moderately aggressive based on their risk profile
- Have an investment horizon of more than five (5) years

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: Investors are exposed to adverse changes in the prices of domestic fixed income securities due to a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions.

Equity Price Risk: Investors are exposed to adverse changes in the prices of stocks listed in the Philippine Stock Exchange, which may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the fund's inability to convert fixed income and equity security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt and equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.

Credit/ Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks

OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index rose month-on-month, gaining by a hefty 2.01% in September as Philippine government bond yields decreased by an average of 52 basis points (bps). Average daily trading volume for the month reached Php 50.2 billion, up from Php41.3 billion in August, with most trades concentrated in 5 and 10-year securities. The Bureau of the Treasury (BTr) held four FXTN auctions in September, fully awarding the 3-, 5-, 10-, and 20-year tenors. Auction highs were generally aligned with, or came in slightly below, secondary market bids at the time, with the BTr awarding at 6.050%, 6.075%, 5.974%, and 5.899%, respectively.

On the domestic front, we saw headline inflation return to its downward trend as it decelerated to 3.3% in August from 4.4% in July, exceeding economists' median estimate of 3.6%. The lower-than-expected inflation was driven mainly by decreases in food inflation after lower rice tariffs brought rice prices down to 14% from 21% a month earlier. Another driver for the decline in yields was the BSP's announcement to reduce the reserve requirement ratios (RRRs) by 250 basis points for universal banks down to 7%. Every 1% cut in RRR is estimated to release 130 to 150 billion pesos worth of liquidity into the system. This new RRR will take effect on October 25, 2024.

Internationally, US inflation decelerated from 2.9% in July to 2.5% in August, in line with median estimates. US Federal Reserve officials highlighted the ongoing moderation in inflation and slowing economic data, supporting the case for a possible rate cut in September.

The Philippine Stock Exchange Index (PSEi) surged in September driven by strong foreign flows. The rally emanated from the US Federal Reserve's (The Fed) decision to cut its key overnight borrowing rate by 50 basis points that spurred the appetite for riskier assets. On the local economic front, the Bangko Sentral ng Pilipinas' (BSP) surprise announcement of reducing the reserve requirement ratio (RRR) by 250 basis points to 7% further buoyed the local bourse. The index breached the 7,400 mark until profit-taking took place. By the end of the month, the PSEi settled at 7,272.65 or 5.4% higher month-on-month.

The market turnover rose by 16% to Php6.57 billion in September from Php5.63 in the prior month. This was supported by net foreign inflow at US\$346 million. This is the biggest monthly inflow for year and has pushed the year-to-date net foreign flow to the positive territory. Top foreign bought stocks were SM (+US\$47.2 million), AC (US\$36.2 million) and ALI (US\$35.3 million).

On a per stock basis, the top three index gainers for the month include: JGS (+18.30%), GTCAP (+16.99%) and URC (+13.96%). Meanwhile, the bottom three performers were: SMC (-9.09%), SCC (-4.13%) and WLCON (-2.66%).

Fund Performance. The fund returned 1.79% in September, above the benchmark by 19 basis points. Year-to-date, the Fund registered a gain of 5.45%, above the benchmark by 6 basis points.

Fund Strategy. The Fund looks to gradually increase its duration position as interest rates are expected to fall towards year-end. While inflation has settled within the BSP's target in the past months, upside risks are still present. The BSP has already decreased its policy rates by 25 basis points to 6.25%. The central bank remains vigilant in monitoring inflation figures before easing rates further. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.

For equities: The Fund will accumulate on market dips as volatility from geopolitical risks coupled with relatively thin market liquidity remain. The Fund's preference is still for companies with leading market capitalization and good fundamentals as well as dividend paying stocks.
