OUTLOOK AND STRATEGY

Market Review. Global equities posted strong returns in March. Economic data releases continued to reflect a resilient US economy, with the jobs report for February showing 275,000 jobs added, above estimates of 200,000. In terms of business activity, the US economy sustained the pace of its expansion, with its composite PMI at 52.1, supported by increasing output in the manufacturing sector. On the inflation front, US inflation slightly accelerated in February, with the headline CPI posting 3.2% year-on-year, higher than expectations and the previous month's reading. Nonetheless, the US Federal Reserve kept rates steady and echoed their focus on keeping inflation back on target. Sentiment continues to be supported by positive corporate earnings and renewed rate cut expectations as Federal Reserve maintained its outlook of three quarter-point cuts for the year. Outside of the US, Japan emerged as the top performer supported by increasing investor optimism in the region driven by mild inflation, wage growth and improved corporate earnings. Furthermore, the Bank of Japan ended its negative interest rate policy and raised its rates for the first time in almost two decades, signaling that the central bank believes the macro-outlook on Japan's economy is sustainable. MSCI All Country World Index returned 0.93% for the month, with developed outperforming emerging markets amid lingering concerns over China's growth outlook.

Fund Performance. The fund returned 2.57%, lagging the benchmark by 42 basis points. Security selection detracted from performance.

Fund Strategy. While markets have priced in peak interest rates in 2024 with possible rate cuts in the second half of the year, we continue to be conscious of the continued higher interest rate environment and its effect on global growth, corporate earnings and consequently, global equities moving forward. Against this backdrop, we prefer to be in higher quality and larger capitalization stocks. In terms of regional allocation, the fund is constructive in US and Japan while remaining mindful of its valuations. In the long term, we like stocks with sustainable characteristics as the world transitions towards net zero carbon emission targets.
