KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: The fund invests in short term domestic fixed income securities, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. Factors/events that may lead to a rise in interest rates include adverse market conditions, issuer-specific factors/events and/or negative developments in domestic political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the Fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Credit/Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt securities issued by related parties, as well as the execution of trade transactions with related counterparties.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The BPI Money Market Index returned 0.33% in October, as short-term government bond yields saw limited movement. Average daily trading volume for the month reached Php 39.6 billion, down from Php50.2 billion in September, with most trades concentrated in 5 and 10-year securities. The Bureau of the Treasury (BTr) held four Treasury Bill auctions in October, all of which were fully awarded. The final Treasury bill auction concluded with average yields of 5.586%, 5.752%, and 5.751% for the 91-day, 182-day, and 364-day bills, respectively. Additionally, the BSP held four BSP Bill auctions in August, all of which were fully awarded as well. The last BSP bill auction saw average yields of 6.2979% and 6.2988% for the 28-day and 56-day bills, respectively.

On the domestic front, inflation continued its downward trend as it decelerated to 1.9% in September from 3.3% in August, much lower than economists' median estimate of 2.5%. The lower-than-expected inflation was driven by slower food price increases and a decline in transportation costs. Consequently, the Bangko Sentral ng Pilipinas cut rates by 25 basis points during its policy meeting in October, citing easing price pressures. The BSP will continue to vigilantly monitor economic data releases in determining its policy actions moving forward.

Internationally, US inflation decelerated from 2.5% in August to 2.4% in September, in line with market estimates. However, despite evidence of easing inflation, US Treasuries were extremely volatile for the month as investors anticipated the upcoming US elections in early November.

Fund Performance. The Fund returned 0.37% during the month, outperforming the benchmark by 3 basis points.

Fund Strategy. The Fund favors the safety of shorter-dated securities and time deposits. Expectations of interest rates staying elevated may help maintain current portfolio yield.
