## CLIENT SUITABILITY

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust / Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The BPI PERA Corporate Income Fund is suitable only for investors who:

- Are classified as aggressive based on their risk profile
- Have an investment horizon of at least five (5) years.

## KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

**Interest Rate Risk:** Investors are exposed to adverse changes in the prices of domestic fixed income securities due to a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise in interest rates include adverse market conditions, issuer-specific factors / events and/or negative developments in domestic political and economic conditions.

**Liquidity Risk:** Possibility to experience losses due to the fund's inability to convert assets into cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price.

**Related Party Risk:** Risk of any actual or potential conflicts of interest in handling of related party transactions.

**Credit/Default Risk:** Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

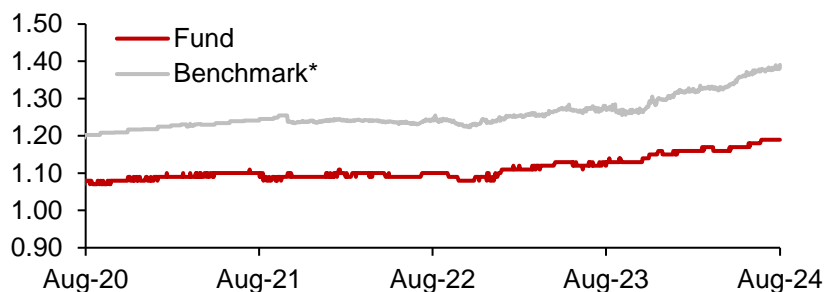

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks

## OUTLOOK AND STRATEGY

**Market Review.** The BPI Government Bond Index rose by 0.72% in August as Philippine government bond yields decreased by an average of seven basis points (bps). Average daily trading volume for the month reached Php41.3 billion, up from Php34.5 billion in July, with most trades concentrated in 5- to 10-year securities. The Bureau of the Treasury (BTr) held four FXTN auctions in August, fully awarding the 5-, 7-, 15-, and 20-year tenors. Auction highs generally aligned with, or came in slightly below, secondary market bids at the time, with the BTr awarding at 6.128%, 6.14%, 6.125%, and 6.22%, respectively.

On the domestic front, July headline inflation accelerated to 4.4% from 3.7% in June, exceeding economists' median estimate of 4.0%. The higher-than-expected inflation was driven mainly by increases in housing & utilities (2.3% vs 0.1% in June), education (5.8% vs 3.8%), transport (3.6% vs 3.1%), and food & non-alcoholic beverages (6.4% vs 6.1%). Despite the inflationary pressure, the BSP cut rates by 25 bps in August, marking the first reduction in four years. Economists forecast that inflation may have cooled to 3.7% in August.

Internationally, US inflation decelerated from 3.0% in June to 2.9% in July, slightly below the 3.0% expectation. US Federal Reserve officials highlighted the ongoing moderation in inflation and slowing economic data, supporting the case for eventual policy rate cuts.

**Fund Performance.** The Fund returned 0.00% for the month, underperforming the benchmark by 103 bps in August.

**Fund Strategy.** The Fund will continue to invest in a diversified mix of securities primarily issued by Philippine corporations.
