OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index returned -0.23% in November as Philippine government bond yields rose by an average of 24 basis points (bps). Average daily trading volume for the month reached Php36.1 billion, lower than Php39.5 billion in October, with most trades concentrated in 5-year followed by 1-year papers. Despite the lower average trading volume, foreign investors' fixed income volume was net buying for the month compared to previous month's net selling.

The Bureau of the Treasury (BTr) held two FXTN auctions in November, offering the 5-, and 20-year tenors. FXTNs 20-27 (20-year) and 7-67 (5-year) were fully awarded at average yields of 6.095% and 5.954%, respectively.

Locally, October headline inflation rose to 2.3% year-on-year (YoY) from 1.9% YoY in September, well within Bangko Sentral ng Pilipinas' (BSP) forecast range of 2.0% to 2.8% for the month. The pick-up in inflation was driven mainly by faster food inflation due to adverse weather conditions for the month and tapering of favorable base effects from last year. Rice inflation in October also accelerated by 9.6% YoY from September's 5.7% YoY, breaking its 6-month deceleration streak. The reversal of the course due to year-on year base effects as rice inflation slowed in 2023 after the government implemented a rice price ceiling shortly last year.

Fund Performance. The Fund returned 0.00% for the month, underperforming the benchmark by 25 bps in November.

Fund Strategy. The Fund will continue to invest in a diversified mix of securities primarily issued by Philippine corporations.
