Clients are advised to read the Declaration of Trust / Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The BPI PERA Corporate Income Fund is suitable only for investors who:

- Are classified as aggressive based on their risk profile
- Have an investment horizon of at least five (5) years.

## KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

**Interest Rate Risk:** Investors are exposed to adverse changes in the prices of domestic fixed income securities due to a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise in interest rates include adverse market conditions, issuer-specific factors / events and/or negative developments in domestic political and economic conditions.

**Liquidity Risk:** Possibility to experience losses due to the fund's inability to convert assets into cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price.

**Related Party Risk:** Risk of any actual or potential conflicts of interest in handling of related party transactions.

**Credit/Default Risk:** Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

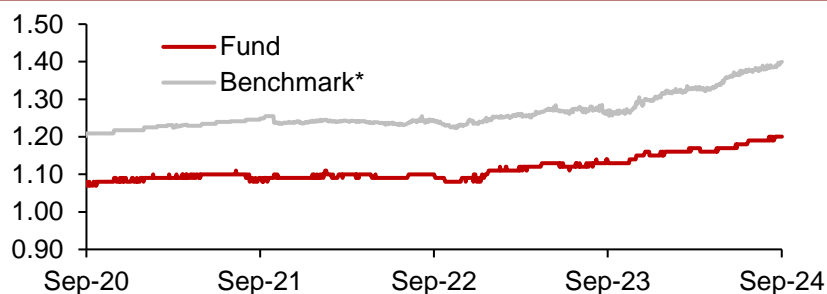

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks

## OUTLOOK AND STRATEGY

**Market Review.** The BPI Government Bond Index rose month-on-month, gaining by a hefty 2.01% in September as Philippine government bond yields decreased by an average of 52 basis points (bps). Average daily trading volume for the month reached Php 50.2 billion, up from Php41.3 billion in August, with most trades concentrated in 5 and 10-year securities. The Bureau of the Treasury (BTr) held four FXTN auctions in September, fully awarding the 3-, 5-, 10-, and 20-year tenors. Auction highs were generally aligned with, or came in slightly below, secondary market bids at the time, with the BTr awarding at 6.050%, 6.075%, 5.974%, and 5.899%, respectively.

On the domestic front, we saw headline inflation return to its downward trend as it decelerated to 3.3% in August from 4.4% in July, exceeding economists' median estimate of 3.6%. The lower-than-expected inflation was driven mainly by decreases in food inflation after lower rice tariffs brought rice prices down to 14% from 21% a month earlier. Another driver for the decline in yields was the BSP's announcement to reduce the reserve requirement ratios (RRRs) by 250 basis points for universal banks down to 7%. Every 1% cut in RRR is estimated to release 130 to 150 billion pesos worth of liquidity into the system. This new RRR will take effect on October 25, 2024.

Internationally, US inflation decelerated from 2.9% in July to 2.5% in August, in line with median estimates. US Federal Reserve officials highlighted the ongoing moderation in inflation and slowing economic data, supporting the case for a possible rate cut in September.

**Fund Performance.** The Fund returned 0.84% for the month, outperforming the benchmark by 16 bps in September.

**Fund Strategy.** The Fund will continue to invest in a diversified mix of securities primarily issued by Philippine corporations.

## LIST OF PROSPECTIVE INVESTMENTS
