OUTLOOK AND STRATEGY

Market Review. The BPI Money Market Index returned 0.68% in September, as short-term government bond yields saw limited movement. Average daily trading volume for the month reached Php 50.2 billion, up from Php41.3 billion in August, with most trades concentrated in 5 and 10-year securities. The Bureau of the Treasury (BTr) held four Treasury Bill auctions in September, all of which were fully awarded. The final Treasury bill auction concluded with average yields of 5.196%, 5.005%, and 5.487% for the 91-day, 182-day, and 364-day bills, respectively. Additionally, the BSP held four BSP Bill auctions in August, all of which were fully awarded as well. The last BSP bill auction saw average yields of 6.4695% and 6.5006% for the 28-day and 56-day bills, respectively.

On the domestic front, we saw headline inflation return to its downward trend as it decelerated to 3.3% in August from 4.4% in July, exceeding economists' median estimate of 3.6%. The lower-than-expected inflation was driven mainly by decreases in food inflation after lower rice tariffs brought rice prices down to 14% from 21% a month earlier. Another driver for the decline in yields was the BSP's announcement to reduce the reserve requirement ratios (RRRs) by 250 basis points for universal banks down to 7%. Every 1% cut in RRR is estimated to release 130 to 150 billion pesos worth of liquidity into the system. This new RRR will take effect on October 25, 2024.

Internationally, US inflation decelerated from 2.9% in July to 2.5% in August, in line with median estimates. US Federal Reserve officials highlighted the ongoing moderation in inflation and slowing economic data, supporting the case for a possible rate cut in September.

Fund Performance. The Fund returned 0.76% during the month of September, outperforming its benchmark by 38 basis points.

Fund Strategy. The Fund favors the safety of shorter-dated securities and time deposits. Expectations of interest rates staying elevated may help maintain current portfolio yield.
