OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index rose 1.96% in July as Philippine government bond yields fell by 30 basis points (bps) on average. Average daily trading volume for the month amounted to Php34.5 billion, higher than June's Php17.0 billion with trades mostly seen in 5- to 10-year securities. The Bureau of the Treasury (BTr) held five FXTN auctions in July which were all fully awarded.

In the local space, June headline inflation decelerated from 3.9% in May to 3.7% in June. The latest figure was also below economists' median estimate of 3.9%. The better-than-expected inflation was mainly driven by steep declines in power rates and slower increases in oil prices. In line with this, Bangko Sentral ng Pilipinas (BSP) Governor Eli Remolona issued statements supporting policy rate cuts soon, potentially as early as in August.

In the global space, US inflation decelerated from 3.3% in May to 3.0% in June, also below the 3.1% expectations. US Federal Reserve officials highlighted the progress in moderating inflation and slowing economic data which support eventual policy rate cuts.

Fund Performance. The Fund rose by 0.81% for the month, 3 basis points below its benchmark.

Fund Strategy. The Fund looks to maintain its current duration position as interest rates are expected to stabilize over the medium term. It will likewise continue to hold high quality corporate bonds for yield enhancement. While inflation has settled within the BSP's target in the past months, upside risks are still present. The BSP remains vigilant in monitoring supply side pressures and potential second-round effects. The central bank signalled that it is waiting for inflation rates to fall comfortably within the 2-4% target before cutting policy rates. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
