OUTLOOK AND STRATEGY

Market Review. The JP Morgan Asia Credit Index (JACI) Philippines returned 2.51% in August as Philippine dollar-denominated yields declined, tracking the movements in US Treasuries. The 10-year US Treasury bond yield dropped by 13 bps from 4.03% to 3.90% in the same period.

Global bond yields fell further as economic data releases reinforced the view that the time has come for the US Federal Reserve to adjust its policy rates. US inflation slowed down further from 3.0% in June to 3.0% in July, lower than market expectations. Meanwhile, the Core PCE Index or the Personal Consumption Expenditure Core Price Index, which is the Federal Reserve's preferred gauge for inflation, rose at a mild pace from 2.5% in June to 2.6% in June. While spending rate increased moderately, income growth was more sluggish, and savings rate declined. Moreover, the much-awaited speech of Fed Chair Powell at the Jackson Hole symposium came out with a dovish tone supporting the policymaker's plan to ease the key rate.

On the domestic front, July inflation came in at 4.4% year-on-year, higher than the previous print of 3.7% and higher than market expectations. The local inflation quickened in July following increase in housing, electricity, gas, and other fuel prices. Despite the uptick in prices, the Bangko Sentral ng Pilipinas finally reduced its policy rates by 25 basis points to 6.25%, becoming one of the first Asian central banks to ease rates besides China.

Fund Performance. The Fund returned 0.39% for the month, 3 basis points below its benchmark.

Fund Strategy. The Fund will maintain its duration of less than one. Expectations of interest rates staying elevated may help maintain current portfolio yield.
