Market Review. The JP Morgan Asia Credit Index (JACI) Philippines rose 1.15% in July as Philippine dollar-denominated yields declined, tracking the movements in US Treasuries. The 10-year US Treasury bond yield dropped by 37 bps from 4.40% to 4.03% in the same period.

Global bond yields fell as economic data releases further reinforced the view that the US Federal Reserve could accelerate its monetary policy rate cuts. US inflation slowed down further from 3.3% in May to 3.0% in June, lower than market expectations. Meanwhile, the PCE or the Personal Consumption Expenditure Core Price Index or PCE, which is the Federal Reserve's preferred gauge for inflation, also dropped from 2.6% in May to 2.5% in June.

On the domestic front, June inflation came in at 3.7% year-on-year, lower than the 3.9% recorded last May and slower than market expectations. The slowdown was evident in a number of segments, particularly in housing in transport. Moving forward, rice tariff reductions could tame inflation further. The Bangko Sentral ng Pilipinas has reiterated that it remains vigilant of forthcoming data releases and will act accordingly in terms of adjusting its monetary policy.

Fund Performance. The Fund returned 0.39% for the month, 8 basis points below its benchmark.

Fund Strategy. The Fund will maintain its duration of less than one. Expectations of interest rates staying elevated may help maintain current portfolio yield.
