OUTLOOK AND STRATEGY

Market Review. The JP Morgan Asia Credit Index (JACI) Philippines returned 0.21% in November as Philippine dollar-denominated yields marginally declined, tracking the movements in US Treasuries. The 10-year US Treasury bond yield dropped by 11 bps from 4.28% to 4.17% during the period.

The global rate-cutting cycle continued in November as the US Fed cut rates by another 25 basis points, citing easing inflationary pressures and a job market that potentially needs support. The Bank of England followed suit, also cutting its rates by 25 basis points, though notably lifted its inflation projections for 2025 and 2026. However, bond market gains were limited as the US elections concluded with Donald Trump emerging as the winning presidential candidate. Concerns over the impact of his policies on inflation dampened sentiment in the fixed income market.

On the domestic front, October headline inflation rose to 2.3% year-on-year (YoY) from 1.9% YoY in September. This was well within Bangko Sentral ng Pilipinas' (BSP) forecasted range of 2.0% to 2.8% for the month. The pick-up in inflation was driven mainly by faster food inflation due to adverse weather conditions for the month, and the tapering of favorable base effects from last year. The BSP will continue to monitor local data in determining its policy actions moving forward.

Fund Performance. The Fund returned 0.31% for the month, 4 basis points below its benchmark.

Fund Strategy. The Fund will maintain its duration of less than one. Expectations of interest rates staying elevated may help maintain current portfolio yield.
