KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Market/Price Risk:

Investors are exposed to adverse changes in the prices of large cap US stocks which may be brought about by adverse market conditions, unfavorable company earnings and valuations, and negative developments in the political and economic conditions of countries where investee companies are domiciled.

Liquidity Risk:

Investors are exposed to the risk of loss due to the target fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited participants in the market, low trading volumes, market disruptions, among others.

Country Risk:

Investors are exposed to the risk of loss arising from negative developments in the political, economic and social conditions of countries, primarily the US, which may adversely affect the value of the feeder fund.

FX Risk:

Investors are exposed to foreign exchange risk when the underlying investments of the target fund are in different currencies from the base currency of the fund. For Class P unit investors, additional foreign exchange risk is brought about by the Fund being denominated in Philippine Pesos. The Fund will not hedge foreign exchange exposure

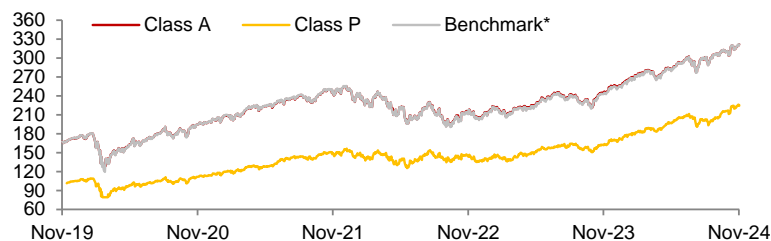

The Fund's investment outlets undergo proper screening and evaluation in accordance with the Trustee's accreditation process. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.
