KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest	Investors are exposed to adverse changes in the prices of domestic fixed income securities due to a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise in interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions..
Equity	Investors are exposed to adverse changes in the prices of stocks listed in the Philippine Stock Exchange, which may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.
Price Risk:	
Liquidity Risk:	Investors are exposed to the risk of loss due to the fund's inability to convert fixed income and equity security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.
Related Party Risk	Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt and equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.
Credit/ Default Risk	Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index rose 0.68% in June as the local yield curve fell by 6 basis points (bps) on average. Average daily trading volume for the month amounted to Php20.86 billion, lower than May's Php23.86 billion with trades mostly seen on the belly of the curve.

The Bureau of the Treasury (BTr) held four FXTN auctions in June. The 7-year FXTN 20-17 and 20-year FXTN 20-27 re-issuances were fully awarded at average yields of 6.624% and 6.860%, respectively. Meanwhile, the 10-year FXTN 10-72 and 15-year FXTN 20-23 re-issuances, were partially awarded at average yields of 6.754% and 6.781%, respectively. The Bureau of Treasury (BTr) announced its borrowing program for the third quarter of 2024, with weekly Treasury bill offers increased to PHP 20 billion. The BTr plans to issue more tenors for the quarter, offering PHP 30 billion each for the 3-, 5-, 7-, and 10- year papers while the 14- and 20-year Treasury bond offers were reduced to PHP 25 billion.

In the local space, May headline inflation accelerated for the fourth straight month by 3.9% year-on-year from the previous month's 3.8%. The main drivers of inflation included housing, water, electricity, and gas while rice prices saw a deceleration from the previous figure of 23.9% to 23%. In an effort to curb elevated rice prices, the National Economic Development Authority (NEDA) Board approved the new Comprehensive tariff program which reduces tariff rates for rice imports alongside other essential commodities effective until 2028. The Bangko Sentral ng Pilipinas (BSP) held its policy rate steady at 6.5% during their Monetary Board meeting in June. Despite the weakening Peso, BSP Governor Eli Remolona had dovish remarks on the possibility of an August rate cut, which is ahead of the market expectations of the Federal Reserve to begin easing in September. The BSP revised both its 2024 and 2025 inflation forecast to 3.1% from 3.8% and 3.7%, respectively.

The Philippine Stock Exchange Index (PSEi) went narrowly down for the month of June. Market sentiment was weak due to the depreciation of the Philippine Peso when it hovered near the Php59 level. In addition, the FTSE rebalancing related activity further pulled the local bourse to the year-low of 6,158.58. However, the market bounced towards the latter part of the month on bargain hunting as investors digested BSP Governor's dovish rhetoric and lower inflation outlook. The PSEi closed at 6,411.91 or 0.3% lower month-on-month in June.

Trading activity was subdued for the month. Average Daily Turnover only recorded at Php4.4 billion. Meanwhile, foreign activity continued to register net outflows at US\$104 million for June. Index proxies SM and AC both recorded the biggest outflow as market sentiment remained weak. Foreign participation improved from 46% to 48% for the month

On a per name basis, the top three index gainers for the month were: AEV(+10.70%), MBT (+8.86%) and ALI (+8.57%). Meanwhile, the bottom three performers include: MONDE (-16.07%), JGS (-15.97%) and CNPF (-14.27%).

Fund Performance. The Fund returned 0.62% in June, outperforming the benchmark by 42 bps. Year-to-date, the Fund registered a loss of 0.92%, behind the benchmark by 90 bps.

Fund Strategy. The Fund looks to maintain its current duration position as interest rates are expected to stabilize over the medium term. While inflation has settled within the BSP's target in the past months, upside risks are still present. The BSP remains vigilant in monitoring supply side pressures and potential second-round effects. The central bank signalled that it is waiting for inflation rates to fall comfortably within the 2-4% target before cutting policy rates. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.

For equities: The Fund will retain its defensive position as inflation and geopolitical risks remain coupled with thin market liquidity. The Fund's preference is still for companies with leading market capitalization and good fundamentals as well as dividend paying stocks.
