Market Review. The BPI Government Bond Index rose 1.96% in July as Philippine government bond yields fell by 30 basis points (bps) on average. Average daily trading volume for the month amounted to Php34.5 billion, higher than June's Php20.8 billion with trades mostly seen in 5- to 10-year securities. The Bureau of the Treasury (BTr) held five FXTN auctions in July which were all fully awarded.

In the local space, June headline inflation decelerated from 3.9% in May to 3.7% in June. The latest figure was also below economists' median estimate of 3.9%. The better-than-expected inflation was mainly driven by steep declines in power rates and slower increases in oil prices. In line with this, Bangko Sentral ng Pilipinas (BSP) Governor Eli Remolona issued statements supporting policy rate cuts soon, potentially as early as in August.

In the global space, US inflation decelerated from 3.3% in May to 3.0% in June, also below the 3.1% expectations. US Federal Reserve officials highlighted the progress in moderating inflation and slowing economic data which support eventual policy rate cuts.

The Philippine Stock Exchange Index (PSEi) surged for the month of July, posting a 3.23% month-on-month increase to close at 6,619.09. Market sentiment drastically improved on expectations of an interest-rate cut by the Bangko Sentral ng Pilipinas (BSP) on its upcoming Monetary Board Meeting in August. The Philippine inflation figure in June which eased to +3.7% or lower than +3.9% consensus forecasts, further added to the optimism. Moreover, the Philippine Peso recorded a monthly gain at +0.42% to 58.365.

For trading activity, the PSEi saw less liquidity for the month with Average Daily Turnover recorded at Php4.35 billion or 1.2% lower than Php4.4 billion tallied in June. In terms of foreign activity, foreigners turned net buyers in July at US\$60 million. Top foreign bought names include SM (US\$25.9 million), BDO (US\$2.9 million) and BPI (US\$14.9 million). Foreign participation, likewise improved to 51%.

On a per stock basis, the top three index gainers for the month include: ACEN (+9.80%), SM (+9.33%) and PGOLD (+8.68%). Meanwhile, the bottom three performers were: BLOOM(-13.04%), NIKL (-9.70%) and AEV (-8.63%).

Fund Performance. The Fund registered a gain of 2.59% in July, outperforming the benchmark by 36 bps. Year-to-date, the Fund registered a gain of 1.59%, behind the benchmark by 91 bps.

Fund Strategy. The Fund looks to maintain its current duration position as interest rates are expected to stabilize over the medium term. While inflation has settled within the BSP's target in the past months, upside risks are still present. The BSP remains vigilant in monitoring supply side pressures and potential second-round effects. The central bank signalled that it is waiting for inflation rates to fall comfortably within the 2-4% target before cutting policy rates. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.

For equities: The Fund will retain its defensive position as inflation and geopolitical risks remain coupled with thin market liquidity. The Fund's preference is still for companies with leading market capitalization and good fundamentals as well as dividend paying stocks.
