**Market Review.** The BPI Government Bond Index rose by 0.72% in August as Philippine government bond yields decreased by an average of seven basis points (bps). Average daily trading volume for the month reached Php41.3 billion, up from Php34.5 billion in July, with most trades concentrated in 5- to 10-year securities. The Bureau of the Treasury (BTr) held four FXTN auctions in August, fully awarding the 5-, 7-, 15-, and 20-year tenors. Auction highs generally aligned with, or came in slightly below, secondary market bids at the time, with the BTr awarding at 6.128%, 6.14%, 6.125%, and 6.22%, respectively.

On the domestic front, July headline inflation accelerated to 4.4% from 3.7% in June, exceeding economists' median estimate of 4.0%. The higher-than-expected inflation was driven mainly by increases in housing & utilities (2.3% vs 0.1% in June), education (5.8% vs 3.8%), transport (3.6% vs 3.1%), and food & non-alcoholic beverages (6.4% vs 6.1%). Despite the inflationary pressure, the BSP cut rates by 25 bps in August, marking the first reduction in four years. Economists forecast that inflation may have cooled to 3.7% in August.

Internationally, US inflation decelerated from 3.0% in June to 2.9% in July, slightly below the 3.0% expectation. US Federal Reserve officials highlighted the ongoing moderation in inflation and slowing economic data, supporting the case for eventual policy rate cuts.

The Philippine Stock Exchange Index (PSEi) rallied for the 2nd consecutive month as investors cheered the Bangko Sentral ng Pilipinas' (BSP) decision to cut policy rate by 25 basis points to 6.25%. The local bourse was further buoyed by growing optimism that US Federal Reserve's (The Fed) will likely reduce rates in September. Market sentiment was also supported by improving GDP number and peso rebound. GDP grew by 6.3% year-on-year in 2Q2024 from 5.8% in 1Q2024 propelled by government spending which rose by 10.7% while the Philippine peso strengthened to Php56.15 or 3.98% on a month-on-month basis. The PSEi moved up 4.2% month-on-month to 6,897.54.

For trading activity, the market's daily value turnover improved to Php5.66 billion in August from Php4.35 billion recorded in the prior month. MSCI rebalancing which occurred at the end of the month helped spur market's turnover. In terms of foreign activity, foreign buying was sustained for another month, notching US\$143 million. Top foreign bought stocks were ALI (+US\$40 million), BDO (US\$32.6 million) and ICT (US\$17.6 million). Foreign participation rose to 56%.

On a per stock basis, the top three index gainers for the month included: CNVRG (+29.98%), ALI (+19.66%) and JFC (+12.96%). Meanwhile, the bottom three performers were: URC (-23.53%), JGS (-15.47%) and AEV (-6.35%).

**Fund Performance.** The Fund registered a gain of 1.59% in August, underperforming the benchmark by 19 bps. Year-to-date, the Fund registered a gain of 3.21%, behind the benchmark by 112 bps.

**Fund Strategy.** The Fund looks to gradually increase its duration position as interest rates are expected to fall towards year-end. While inflation has settled within the BSP's target in the past months, upside risks are still present. The BSP has already decreased its policy rates by 25 basis points to 6.25%. The central bank remains vigilant in monitoring inflation figures before easing rates further. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.

For equities: The Fund will accumulate on market dips as volatility from geopolitical risks coupled with thin market liquidity remain. The Fund's preference is still for companies with leading market capitalization and good fundamentals as well as dividend paying stocks.
