- Have an investment horizon of more than five (5) years

**KEY RISKS AND RISK MANAGEMENT**

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

**Interest Rate Risk:** The fund invests in a long-term portfolio of domestic government and corporate securities, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions.

**Liquidity Risk:** Investors are exposed to the risk of loss due to the fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

**Credit/ Default Risk:** Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

**Related Party Risk:** Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt securities issued by related parties, as well as the execution of trade transactions with related counterparties.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

## OUTLOOK AND STRATEGY

**Market Review.** The BPI Government Bond Index fell 2.11% in April as the local yield curve rose 64 basis points (bps) on average. Average daily trading volume for the month amounted to Php14.73 billion, lower than March's Php19.73 billion with trades mostly seen on the belly of the curve.

The Bureau of the Treasury (BTr) held four FXTN auctions in April. The 7-year FXTN 07-71 was fully awarded at an average yield of 6.299%. The 10-year FXTN 10-72, and 20-year FXTN 20-26 reissuances were partially awarded at average yields of 6.365%, and 6.900%, respectively. The bids for the FXTN 20-23 issuance were fully rejected. Had the BTr awarded the bids for the 15-year paper, average rates would have risen to 6.987%.

In the local space, March headline inflation rose further by 3.7% year-on-year from the previous month's 3.4%. Food, transport, and restaurants were the main driver of inflation, with rice prices reporting 24.4% increase year-on-year, fastest pace since 2009. Despite the recent spike in prices, inflation print managed to stay within the central bank's 2 to 4% target range. During the recent Monetary Board meeting, the BSP held their policy rate steady at 6.5% after a higher inflation figure. The central bank also revised their 2024 risk-adjusted inflation forecast from 3.9% to 4.0% as risks to inflation remain tilted to the upside.

**Fund Performance.** The Fund posted a return of -3.15% for the month of April, underperforming its benchmark by 104 bps. Year-to-date, the Fund registered a loss of -3.22%, behind the benchmark by 140 bps.

**Fund Strategy.** The Fund looks to maintain its current duration position as interest rates are expected to stabilize over the medium term. While inflation has settled within the BSP's target in the past months, upside risks are still present. The BSP remains vigilant in monitoring supply side pressures and potential second-round effects. The central bank signalled that it is waiting for inflation rates to fall comfortably within the 2-4% target before cutting policy rates. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
