KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: The fund invests in a long-term portfolio of domestic government and corporate securities, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Credit/ Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt securities issued by related parties, as well as the execution of trade transactions with related counterparties.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index rose 1.49% in May as the local yield curve fell by 22.28 basis points (bps) on average. Average daily trading volume for the month amounted to Php23.86 billion, higher than April's Php14.73 billion with trades mostly seen on the short-end of the curve.

The Bureau of the Treasury (BTr) held four FXTN auctions in May. The 10-year FXTN 10-72 and 25-year FXTN 20-23 were fully awarded at average yields of 6.825% and 6.950%, respectively. Meanwhile, the new 20-year issuance, FXTN 20-27, was only partially awarded and priced at a coupon of 6.875%. The final bond auction for the month was FXTN 3-30, fully awarded at an average rate of 6.347%. Demand was generally healthy for the bonds issued throughout the month.

In the local space, April headline inflation rose by 3.8% year-on-year from the previous month's 3.7%. Food, transport, and restaurants were the main driver of inflation, though the increase in rice prices slowed for the first time in six months. Nonetheless, the inflation print remained within the central bank's 2 to 4% target range. The country's economy grew by 5.7% year-on-year for the first quarter of 2024, lower than consensus estimate of 5.9%. While net exports contributed positively for the period, other sectors such as private consumption and government spending appeared to be slowing. The first quarter GDP growth figure falls short of the government's official target of 6-7% for the year.

Fund Performance. The Fund posted a return of 1.97% for the month of May, outperforming its benchmark by 48 bps. Year-to-date, the Fund registered a loss of -1.31%, behind the benchmark by 95 bps.

Fund Strategy. The Fund looks to maintain its current duration position as interest rates are expected to stabilize over the medium term. While inflation has settled within the BSP's target in the past months, upside risks are still present. The BSP remains vigilant in monitoring supply side pressures and potential second-round effects. The central bank signalled that it is waiting for inflation rates to fall comfortably within the 2-4% target before cutting policy rates. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
