KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk:	The fund invests in a medium-term portfolio of domestic government and corporate securities, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions.
Liquidity Risk:	Investors are exposed to the risk of loss due to the fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.
Credit/ Default Risk:	Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.
Related Party Risk:	Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt securities issued by related parties, as well as the execution of trade transactions with related counterparties.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index rose 1.96% in July as Philippine government bond yields fell by 30 basis points (bps) on average. Average daily trading volume for the month amounted to Php34.5 billion, higher than June's Php20.8 billion with trades mostly seen in 5- to 10-year securities. The Bureau of the Treasury (BTr) held five FXTN auctions in July which were all fully awarded.

In the local space, June headline inflation decelerated from 3.9% in May to 3.7% in June. The latest figure was also below economists' median estimate of 3.9%. The better-than-expected inflation was mainly driven by steep declines in power rates and slower increases in oil prices. In line with this, Bangko Sentral ng Pilipinas (BSP) Governor Eli Remolona issued statements supporting policy rate cuts soon, potentially as early as in August.

In the global space, US inflation decelerated from 3.3% in May to 3.0% in June, also below the 3.1% expectations. US Federal Reserve officials highlighted the progress in moderating inflation and slowing economic data which support eventual policy rate cuts.

Fund Performance. The Fund returned 0.50% for the month, above its benchmark by 1 basis points.

Fund Strategy. The Fund looks to gradually increase its duration position as interest rates are expected to fall towards year-end. While inflation has settled within the BSP's target in the past months, upside risks are still present. The BSP has already decreased its policy rates by 25 basis points to 6.25%. The central bank remains vigilant in monitoring inflation figures before easing rates further. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
