## OUTLOOK AND STRATEGY

**Market Review.** The JP Morgan Asia Credit Index (JACI) Philippines declined by 1.44% in December as Philippine dollar-denominated yields tracked movements in US Treasuries. The 10-year US Treasury bond yield jumped by 40 bps from 4.17% to 4.57% during the period.

Global bonds sold off after the Federal Reserve (the Fed) revised its rate projections for 2025 onward. Despite cutting policy rates by another 25 basis points during the final FOMC meeting for the year, the Fed updated its dot plot to show 2 rate cuts for 2025 in lieu of the 4 cuts previously shown. This, along with higher inflation expectations caused investors to trim positions on their bond holdings for the month. Concerns over the inflation impact of incoming President Trump's policies likewise dampened sentiment in the fixed income market.

Despite weakness in the month of December, the JACI Philippines returned 2.98% for full-year 2024.

**Fund Performance.** The Fund returned -2.02% for the month, outperforming its benchmark by 40 basis points. Year-to-date, the fund returned 0.90%, below the benchmark by 189 bps.

**Fund Strategy.** The Fund looks to gradually increase its duration position as yields are expected to fall towards year-end. Global events remain likely to add volatility. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
