Market Review. The Philippine Stock Exchange Index (PSEi) slightly move down by -0.59% month-on-month closing March at 6,900.53. Sentiment was dampened by inflation data showing to be sticky, resulting in a pushback in the aggressive rate cut narrative. Domestic inflation accelerated after four consecutive months of decline as the Feb '24 headline CPI came in at 3.4% (vs. consensus estimates of 3.0%). Furthermore, corporate earnings results came out underwhelming and the FTSE rebalancing also prompted foreign outflows.

In relation, trading activity improved in March, with average daily turnover at US\$124 million or 30% higher month-on-month (MoM). Albeit foreign selling registered at US\$45 million, a reversal from last month's US\$128 million.

On a per name basis, the top three index gainers for the month were: CNPF (+19.40%), CNVRG (+10.67%) and ICT (+10.03%). On the flip side, the bottom three performers were: WLCON (-17.69%), NIKL (-11.89%) and AEV (-11.60%).

Fund Performance. The fund returned 0.28% in March, outperforming the benchmark by 87 bps. Year-to-date, the Fund registered a gain of 7.93%, above the benchmark by 90 bps.

Fund Strategy. The Fund will continue to be defensive, but also opportunistic, as volatility could persist given thin market liquidity and inflation risk is still on the upside. The Fund will focus on companies with leading market capitalization and good fundamentals.
