KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Equity Price Risk: The Fund invests in a concentrated portfolio of stocks listed in the Philippine Stock Exchange, exposing investors to potentially larger losses from a decline in stock prices, compared to funds tracking the index or employing a value style bias/ strategy. Decline in stock prices may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the Fund's inability to convert equity holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.

The Fund's investment outlets undergo proper screening and evaluation in accordance with the Trustee's accreditation process and minimum regulatory requirements. Regulatory exposure limits and asset allocation ranges as provided in the Fund's Plan Rules are strictly adhered to and monitored on a regular basis. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange Index (PSEi) cooled in October following three consecutive months of strong performances. At the beginning of the month, the local bourse continued its ascent to north of 7,500 mark backed by the release of lower-than-expected local inflation print in September at 1.9%. Consequently, the Bangko Sentral ng Pilipinas (BSP) reduced policy rates by 25 basis points to 6.0% for the second time in 2024. However, the PSEi failed to overcome the 7,500 to 7,600 resistance level as profit-taking took place. This coincided with weakness on the Philippine Peso which closed to 58.10 or -3.69% month-on-month. Moreover, risk-off stance was adopted by market players as they awaited the result of the US election. The PSEi gave up 1.78% month-on-month to 7,142.96.

The market turnover slowed to Php5 billion or -24% month-on-month in October. Meanwhile, foreigners continued to be net buyers at US\$22 million, which marked the 4th consecutive month of net foreign buying. Top foreign bought stocks were AC (+US\$24.5 million), BPI (+US\$15 million) and GLO (+US\$10.0 million). In terms of participation level, it was an even split between foreigners and locals at 50%.

On a per stock basis, the top three index gainers for the month include: MER (+11.82%), CNPF (+10.38%) and MONDE (+7.07%). Meanwhile, the bottom three performers include: JGS (-12.59%), WLCON (-12.02%) and ALI (-10.66%). Market breadth was skewed to the negative territory with 23 declines versus 7 advances.

Fund Performance. The fund returned -1.65% in October, outperforming the benchmark by 13 basis points. Year-to-date, the Fund registered a gain of 13.57%, above the benchmark by 283 basis points.

Fund Strategy. The Fund will be defensive as uncertainties from post-US Election results, and volatility from geo-political risks coupled with thin market liquidity remain. The Fund's preference is still for companies with leading market capitalization and good fundamentals as well as dividend paying stocks.
