KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Equity Price Risk: The Fund invests in a concentrated portfolio of stocks listed in the Philippine Stock Exchange, exposing investors to potentially larger losses from a decline in stock prices, compared to funds tracking the index or employing a value style bias/ strategy. Decline in stock prices may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the Fund's inability to convert equity holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.

The Fund's investment outlets undergo proper screening and evaluation in accordance with the Trustee's accreditation process and minimum regulatory requirements. Regulatory exposure limits and asset allocation ranges as provided in the Fund's Plan Rules are strictly adhered to and monitored on a regular basis. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange Index (PSEi) surged for the month of July, posting a 3.23% month-on-month increase to close at 6,619.09. Market sentiment drastically improved on expectations of an interest-rate cut by the Bangko Sentral ng Pilipinas (BSP) on its upcoming Monetary Board Meeting in August. The Philippine inflation figure in June which eased to +3.7% or lower than +3.9% consensus forecasts, further added to the optimism. Moreover, the Philippine Peso recorded a monthly gain at +0.42% to 58.365.

For trading activity, the PSEi saw less liquidity for the month with Average Daily Turnover recorded at Php4.35 billion or 1.2% lower than Php4.4 billion tallied in June. In terms of foreign activity, foreigners turned net buyers in July at US\$60 million. Top foreign bought names include SM (US\$25.9 million), BDO (US\$2.9 million) and BPI (US\$14.9 million). Foreign participation, likewise, improved to 51%.

On a per stock basis, the top three index gainers for the month include: ACEN (+9.80%), SM (+9.33%) and PGOLD (+8.68%). Meanwhile, the bottom three performers were: BLOOM(-13.04%), NIKL (-9.70%) and AEV (-8.63%).

Fund Performance. The Fund registered a gain of 3.42% in July, outperforming its benchmark by 19 bps. Meanwhile, the YTD performance of the Fund reported a gain of 2.04%, underperforming its benchmark by 58 bps.

Fund Strategy. The Fund will retain its defensive position as inflation and geopolitical risks remain coupled with thin market liquidity. The Fund's preference is still for companies with leading market capitalization and good fundamentals as well as dividend paying stocks.
