KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Equity Price Risk: The Fund invests in a concentrated portfolio of stocks listed in the Philippine Stock Exchange, exposing investors to potentially larger losses from a decline in stock prices, compared to funds tracking the index or employing a value style bias/ strategy. Decline in stock prices may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the Fund's inability to convert equity holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.

The Fund's investment outlets undergo proper screening and evaluation in accordance with the Trustee's accreditation process and minimum regulatory requirements. Regulatory exposure limits and asset allocation ranges as provided in the Fund's Plan Rules are strictly adhered to and monitored on a regular basis. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange sharply dropped for the month on large foreign selling. Market sentiment went down largely due to the depreciation of the local currency when it traded north of Php58 against the dollar. This was mostly driven by a strong dollar after the US Federal Reserve (The Fed), according to the FOMC minutes of the meeting, said they may consider pushing back the rate cut amid growing inflation concerns. Moreover, MSCI rebalancing further added to the volatility of the market where the Philippines was estimated to have a US\$100-120-million worth of outflow. The PSEi closed the month of May at 6,433.10 or 3.99% lower on a month-on-month basis.

Trading activity improved mostly due to the MSCI rebalancing. Average Daily Turnover registered at Php7.6 billion. Meanwhile, foreigners continued to be big sellers at US\$174 million recorded in May. MSCI related name – AEV, was the top sold name after its deletion in the Standard Index. Property names were also sold heavily, while telecommunications were top foreign bought names. Consumer names, on the other hand, were mixed. Foreign participation declined to 46%.

On a per name basis, the top three index gainers for the month include: WLCON (+19.76%), ACEN (+15.66%) and CNVRG (+14.47%). Meanwhile, the bottom three performers were: AEV (-16.55%), BDO (-12.28%) and MBT (-11.36%).

Fund Performance. The Fund registered a loss of 4.43% in May, underperforming its benchmark by 44 bps. Meanwhile, the YTD performance of the Fund reported a loss of 1.54%, underperforming its benchmark by 128 bps.

Fund Strategy. The Fund will continue to be defensive, but also opportunistic, as volatility could persist given thin market liquidity and inflation risk is still on the upside. The Fund will focus on companies with leading market capitalization and good fundamentals.
