## OUTLOOK AND STRATEGY

**Market Review.** Domestic fixed income assets performed well in February 2025, with the BPI Government Bond Index posting a return of 1.13% year-to-date. This came even after the Bangko Sentral ng Pilipinas (BSP) surprised investors and decided to keep their key interest rates steady in their February policy meeting. In lieu of a policy rate cut, the BSP announced a cut in the bank's Rate Reserve Requirement (RRR) from the current 7% down to 5%. This move is estimated to release PHP 300Bn of additional liquidity into the system which may cause rates to decline further. Another headwind was inflation with the CPI print for the month of January coming out at 2.9%, the same figure as in December. In spite of all these, the BSP is still widely expected to cut the policy rates by a total of 0.5% (50 basis points) in 2025. For the month of February, the BTr held a total of 4 issuances. All auctions received strong demand, with the 5-, 7-, 10- and 20-year papers seeing average awarded yields of 5.968%, 5.973%, 6.118% and 6.376%, respectively. March will continue to see issuances across the curve with 5-, 7, 10, 3- and 25-year papers slated to be offered.

**Fund Performance.** The Fund continued to track the returns and duration of the iBoxx ABF Philippines. The Fund returned 0.54% for the month, closely tracking the benchmark index.

**Fund Strategy.** The iBoxx index will see minimal changes for the month. The Fund will rebalance to reflect any changes to continue to closely track the duration of its benchmark.
