## OUTLOOK AND STRATEGY

**Market Review.** Domestic fixed income assets performed well in February 2025, with the BPI Government Bond Index posting a return of 1.13% year-to-date. This came even after the Bangko Sentral ng Pilipinas (BSP) surprised investors and decided to keep their key interest rates steady in their February policy meeting. In lieu of a policy rate cut, the BSP announced a cut in the bank's Rate Reserve Requirement (RRR) from the current 7% down to 5%. This move is estimated to release PHP 300Bn of additional liquidity into the system which may cause rates to decline further. Another headwind was inflation with the CPI print for the month of January coming out at 2.9%, the same figure as in December. In spite of all these, the BSP is still widely expected to cut the policy rates by a total of 0.5% (50 basis points) in 2025. For the month of February, the BTr held a total of 4 issuances. All auctions received strong demand, with the 5-, 7-, 10- and 20-year papers seeing average awarded yields of 5.968%, 5.973%, 6.118% and 6.376%, respectively. March will continue to see issuances across the curve with 5-, 7, 10, 3- and 25-year papers slated to be offered.

**Fund Performance.** The Fund gained by 0.32% for the month, 2 basis points below its benchmark.

**Fund Strategy.** The Fund looks to maintain its duration position as interest rates are expected to decline in the medium term. While inflation has settled within the BSP's target in the past months, upside risks are still present. The BSP has already decreased its policy rates by 75 basis points to 5.75% in 2024. The central bank remains vigilant in monitoring inflation figures before easing rates further. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
