## KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

<b>Interest Rate Risk:</b>	Investors are exposed to adverse changes in the prices of domestic fixed income securities due to a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions..
<b>Equity Price Risk:</b>	Investors are exposed to adverse changes in the prices of stocks listed in the Philippine Stock Exchange, which may be brought about by adverse stock market conditions, unfavorable company earnings and valuations and/ or negative developments in domestic and global political and economic conditions.
<b>Liquidity Risk:</b>	Investors are exposed to the risk of loss due to the fund's inability to convert fixed income and equity security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.
<b>Related Party Risk:</b>	Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt and equity securities issued by related parties, as well as the execution of trade transactions with related counterparties.
<b>Credit/ Default Risk:</b>	Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

## BENCHMARK INFORMATION

**Name:** The PSEi Total Return Index (PSEi TRI)

**Date of Change:** January 2, 2025

**Description and Reason for Change:** The Philippine Stock Exchange Index or PSEi is the main index of the Philippine Stock Exchange. The PSEi is a free float-adjusted market capitalization-weighted index of the 30 largest and most active common stock. The PSEi Total Return Index (PSEi TRI) covers both price performance and income from dividend payments by reinvesting cash dividends back to the PSEi according to each constituent's respective market capitalization weightings. The change in the fund's benchmark from PSEi to PSEi TRI is mainly to satisfy the characteristics of a valid benchmark for a UITF in the BSP Circular No. 1178, and to conform with the Global Investment Performance Standards (GIPS) requirement for firms to select an appropriate total return benchmark when available.

*Information about the benchmark may be accessed through Philippine Stock Exchange <https://www.pse.com.ph/>. Alternatively, participants may request information from BPI Wealth at [bpiwealth.com.ph](https://www.bpiwealth.com.ph).*

## OUTLOOK AND STRATEGY

**Market Review.** The Philippine Stock Exchange Index (PSEi) was able to bounce back in February amidst bargain-hunting following the sharp decline in January. The local bourse traded in a tight range as investors digested economic data releases such as January inflation figure—which came out steady at +2.9% or within BSP's range of +2.5% to +3.3%, the BSP policy rate pause, RRR cut, and largely in-line 4Q earnings results. Towards the end of the month, trading activity surged as MSCI rebalancing took place. The PSEi rose by 2.3% to close at 5,997.97 in February.

In terms of trading activity, the Average Daily Turnover soared by 24.8% to Php6.09 billion in February mainly buoyed by the MSCI rebalancing in the last trading day of the month. In terms of foreign activity, foreigners were net sellers yet again, registering at US\$145 million. Top foreign sold stocks were ALI (-US\$38.5 million), URC (-US\$36.7 million), and MBT (-US\$28.4 million). Foreign participation in January was at 53%.

On a per stock basis, the top three index gainers for the month include: SMC (+28.91%), JFC (+15.86%) and MONDE (+13.53%). Meanwhile, the bottom three performers were: EMI (-23.32%), BLOOM (-7.00%) and CBC (-6.99%).

Domestic fixed income assets performed well in February 2025, with the BPI Government Bond Index posting a return of 1.13% year-to-date. This came even after the Bangko Sentral ng Pilipinas (BSP) surprised investors and decided to keep their key interest rates steady in their February policy meeting. In lieu of a policy rate cut, the BSP announced a cut in the bank's Rate Reserve Requirement (RRR) from the current 7% down to 5%. This move is estimated to release PHP 300Bn of additional liquidity into the system which may cause rates to decline further. Another headwind was inflation with the CPI print for the month of January coming out at 2.9%, the same figure as in December. In spite of all these, the BSP is still widely expected to cut the policy rates by a total of 0.5% (50 basis points) in 2025. For the month of February, the BTr held a total of 4 issuances. All auctions received strong demand, with the 5-, 7-, 10- and 20-year papers seeing average awarded yields of 5.968%, 5.973%, 6.118% and 6.376%, respectively. March will continue to see issuances across the curve with 5-, 7, 10, 3- and 25-year papers slated to be offered.

**Fund Performance.** The Fund registered a gain of 1.35% in February, outperforming the benchmark by 21 basis points. Year-to-date, the Fund registered a loss of -0.55%, above the benchmark by 109 basis points.

**Fund Strategy.** The Fund looks to gradually increase its duration position as interest rates are expected to fall over the next few months. Local inflation has settled within the BSP's target in the past months and is expected to be manageable. After easing its policy rates by 75 basis points in 2024, the BSP remains vigilant in monitoring inflation figures before easing rates further. Volatility may persist in the near term driven by global factors, and the portfolio will be actively managed to take advantage of this. Investors in the bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium - to - long term horizon. As for Equities, the Fund will accumulate on market dips as volatility from the upcoming Trump 2.0 policies, geopolitical risks coupled with thin market liquidity continue to persist. The Fund's preference is for companies with leading market capitalization and good fundamentals as well as defensive and high-yielding stocks.
