## **KEY RISKS AND RISK MANAGEMENT**

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate The fund invests in a medium-term portfolio of domestic government and corporate securities, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Credit/ Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt securities issued by related parties, as well as the execution of trade transactions with related counterparties.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

#### OUTLOOK AND STRATEGY

**Market Review**. Domestic fixed income assets performed well in February 2025, with the BPI Government Bond Index posting a return of 1.13% year-to-date. This came even after the Bangko Sentral ng Pilipinas (BSP) surprised investors and decided to keep their key interest rates steady in their February policy meeting. In lieu of a policy rate cut, the BSP announced a cut in the bank's Rate Reserve Requirement (RRR) from the current 7% down to 5%. This move is estimated to release PHP 300Bn of additional liquidity into the system which may cause rates to decline further. Another headwind was inflation with the CPI print for the month of January coming out at 2.9%, the same figure as in in December. In spite of all these, the BSP is still widely expected to cut the policy rates by a total of 0.5% (50 basis points) in 2025. For the month of February, the BTr held a total of 4 issuances. All auctions received strong demand, with the 5-, 7-, 10- and 20-year papers seeing average awarded yields of 5.968%, 5.973%, 6.118% and 6.376%, respectively. March will continue to see issuances across the curve with 5-, 7, 10, 3- and 25-year papers slated to be offered.

Fund Performance. The Fund returned 0.34% for the month, below its benchmark by 8 basis points.

**Fund Strategy**. The Fund looks to maintain its duration position as interest rates are expected to decline in the medium term. While inflation has settled within the BSP's target in the past months, upside risks are still present. The BSP has already decreased its policy rates by 75 basis points to 5.75% in 2024. The central bank remains vigilant in monitoring inflation figures before easing rates further. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
