KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk:	The fund invests in a medium-term portfolio of domestic government and corporate securities, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, issuer-specific factors/ events and/ or negative developments in domestic political and economic conditions.
Liquidity Risk:	Investors are exposed to the risk of loss due to the fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.
Credit/ Default Risk:	Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/ or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.
Related Party Risk:	Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt securities issued by related parties, as well as the execution of trade transactions with related counterparties.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. Domestic fixed income investments performed well in January 2025, with the BPI GS Overall Index up 0.57%. This was due to steady income from bonds and falling yields, as people expect the Bangko Sentral ng Pilipinas (BSP) to cut rates in February after the Philippine economy grew slower than expected in the last quarter of 2024. The economy grew by 5.2%, which was below expectations, partly due to multiple typhoons. Inflation rose to 2.9% in December, driven by higher vegetable prices, utility costs, and transport expenses. The BSP is expected to cut the policy rates by a total of 0.5% (50 basis points) in 2025.

Fund Performance. The Fund returned 0.72% for the month, below its benchmark by 14 basis points.

Fund Strategy. The Fund looks to maintain its duration position as interest rates are expected to decline in the medium term. While inflation has settled within the BSP's target in the past months, upside risks are still present. The BSP has already decreased its policy rates by 75 basis points to 5.75% in 2024. The central bank remains vigilant in monitoring inflation figures before easing rates further. Volatility may persist in the global space, and the portfolio will be actively managed to take advantage of this. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.

LIST OF PROSPECTIVE INVESTMENTS

The following are among the Fund's approved investment outlets, wherein the Trustee intends to invest depending on strategy, availability, or other market-driven circumstances:
