This underlying collective investment scheme is referred to as the Target Fund and selected consistent with the provisions on investment objective and investment policy under Section 7 and Sections 1 and 2 of the Appendix, following the Trustee's established investment process.

The Fund shall have a unit paying feature where income of the Fund received as distributions from the Target Fund is distributed in the form of units called unit income, subject to the investment objective and distribution policy of the Fund.

- Sec. 2 Participation Units - Participation in the Fund shall always be through participation in units of the Fund, and each unit shall have uniform rights and privileges as any other participating unit in the Fund. The beneficial interest in the Fund shall be divided into units, each of which shall represent a pro rata interest, determined under the net asset value per unit (“NAVPU”) valuation methodology, in the aggregate market value of all instruments in the Fund.

The participation or redemption of units of participation in the Fund may be made only on the basis of the valuation methodology under Article V hereof, and in such frequency as indicated in the Appendix, Section 9.

The unrealized income / loss of each Participant in the Fund shall be the difference between the prevailing NAVPU over the acquisition cost of the Participant’s units, multiplied by the number of units held by the Participant. The actual distribution or realization of income shall take place every time a redemption of units from the Fund is made, to the extent of the number of units redeemed.

Participation in the Fund shall be open to Participants with legal capacity to contract and who are not considered US persons under the US securities and tax laws, subject to the other conditions, rules or provisions as stated herein and those established by the Trustee which it deems to be to the best interest of or advantageous to the Fund and its existing participants.

Participants may be required to declare that they are not a US person or US taxpayer and are neither acquiring units in the Fund in behalf of US persons or US taxpayers nor acquiring units with the intent to sell or transfer them to US persons or US taxpayers.

Prospective participants should also consult their own tax advisors as to the specific local or international tax implications of acquiring, holding and redeeming of any units of the Fund.

The Trustee undertakes to perform appropriate screening checks on all underlying investors. In the event any underlying investor holds 10% or more of the value of the Fund, the Trustee shall have the right to provide information of the underlying investor to its counterparties and regulators. Where it is deemed that the investment in the Fund by such underlying investor violates any applicable laws, regulations, or internal policies and guidelines, the Trustee shall procure redemption of the participating units on behalf of such underlying investor.

7. Rules Related to Valuation - The matter of determining the value of the various instruments in the Fund shall be vested in the Trustee through its Board of Directors. Subject to pertinent BSP regulations, the Trustee shall adopt a Marked-to-Market Valuation Methodology which, once adopted, shall herewith be consistently and strictly applied. The basis for pricing/valuation per asset class/asset shall follow existing BSP marking-to-market guidelines.

(a) The NAV shall be computed using the pooled-fund accounting methodology, or more specifically based on the following formula:

	Cash Deposits
+	Market Value of Investment
+	Accrued Interest on Cash Deposits
+	All other assets and receivables
	GROSS ASSET VALUE

-	Accrued Taxes Payable
-	Accrued Trust Fee Payable
-	Other Accrued Expenses
-	Accounts Payable
-	All Other Liabilities
	NET ASSET VALUE

The NAVPU shall be calculated by dividing the NAV by the number of Units Outstanding as of the date of valuation. The NAVPU shall be computed up to two (2) decimal places as follows:

$$\text{NAVPU} = \frac{\text{Total Net Assets of the Fund}}{\text{Total Number of Outstanding Units}}$$

(b) The NAVPU of the Fund shall be computed earliest 12:00NN on the next day following each valuation day and made available not later than 6:00PM of the same day. The NAVPU shall be made available to Participants and published in the Trustee's website.

(c) Suspension of Trading- The Trustee of the Fund may temporarily suspend calculation of the NAV/NAVPU of the Fund, as well as participation to and redemption from the Fund, if it is unable to determine the NAVPU of the Fund due to the suspension of trading of its Target Fund or any fortuitous event, such as fire, natural calamity, public disorder, or national emergency affecting the financial market resulting in the suspension of trading and consequently, the absence of available market prices of securities/instruments.

The suspension of trading of the Target Fund will mean the unavailability of a real-time NAVPU that is reflective of actual market prices.

8. Risk Management and Hedging Policy - For the general and collective interest of the Fund's Participants, the Trustee is authorized to adopt an external or internal risk management and hedging strategy, and a more definitive policy guideline based on generally accepted risk management principles, and duly approved by the Board of Directors of the Trustee.

The Fund may avail itself of instruments solely for the purpose of hedging risk exposures of the existing investments of the Fund while the Target Fund/s may avail itself of instruments for efficient portfolio management (EPM), provided, that the financial derivatives shall not be extensively or primarily used as an investment strategy of the Target Fund and that the risk level of the Target Fund remain consistent with the objective and risk profile of the Fund. Further, the use of financial derivatives must be in

accordance with other existing BSP guidelines, as well as the Trustee's risk management and hedging policies duly approved by the Board of Directors of the Trustee, and disclosed to the Participants.

## 9. Participation and Redemption

- (a) Participation and Redemption Prices - Participation or redemption of units in the Fund, including fractions thereof, shall be based on the applicable NAVPU for the day computed based on Section 7 (Rules Related to Valuation) of this Appendix.
- (b) The Fund shall have an initial NAVPU of USD 100.00/unit.
- (c) The Trustee shall set the minimum amount or number of units required for purchases or redemptions by a Participant in the Fund, which may be changed from time to time by the Trustee, as conditions warrant subject to the Trustee's compliance with Section 414-Q of the MORNBF1. Redemptions received on or before the cut-off time are settled on the 7<sup>th</sup> business day after the valuation day using the NAVPU of that valuation day as the basis for settlement. Valuation day is defined under Article V, Section 1 (a) of the Plan Rules.
- (e) Partial redemption or redemption of unitholdings less than the outstanding units is allowed and shall be based on the applicable NAVPU for the day. On the next business day after the partial redemption, a Transaction Advice shall be sent to the Trustor indicating the remaining outstanding unitholdings. Should a partial redemption result in the investment falling below the required minimum maintaining balance, the Trustee shall automatically close the account, without need of prior notification to the participant, in which case, the entire balance of the account shall be paid through credit to the Trustor/s' Settlement Account based on the applicable NAVPU for the day multiplied by the number of remaining unit holdings.
- (f) Participation and Redemption Cut-off Time. Participation and/or notice of redemption received by the Trustee on or before the cut-off time of 2:00 PM shall be considered as transaction for the day. However, participation/notice of redemption received after the cut-off time shall be considered as transaction for the next applicable valuation day. Upon initial participation, the Participating Trust Agreement shall be made available to the Participant. A Confirmation of Participation or Transaction Advice shall be provided to the Participant for subsequent transactions.
- (g) Redemption Requirements and Conditions. Redemption shall also be subject to the requirement/condition below:
  - a. Redemption Notice Period. The participant of the Fund may redeem its participation on any valuation day. Request for redemption, subject to the cut-off time specified in Section 9 (f) shall be dealt with by the Trustee in chronological order according to the day that notice is received. On the next valuation day after the redemption, a Transaction Advice shall be sent to the Participant. However, the Trustee reserves the right to require from

the Trustor/s a five (5) business day advanced written notice of redemption from the Fund. This required notice may be shortened or extended at the sole discretion of the Trustee depending on the liquidity position of the Fund and the frequency and volume of requests for redemption received by the Trustee at any given time. The Trustee shall communicate these by way of direct written correspondence to each participant, publication of announcement in the Trustee's own website, posting of notices in the premises of the Trustee, or posting/sending of notices in the approved platforms of all duly accredited distribution channels, not shorter than three (3) business days before any change is implemented.

- b. Early Redemption Fee. An early redemption fee of one percent (1.00%) based on the total value of the units redeemed shall be charged to the concerned Participant in case of full or partial redemption prior to the completion or lapse of the minimum holding period. Such fee shall form part of the Fund.

The Trustee, however, on a case to case basis, shall have the authority to waive the early redemption fee as when there are amendments to the plan rules, upon termination of the fund or to address operational concerns.

- (h) Suspension of Participations and Redemptions - Conditions for the suspension of participations to, and redemptions from the Fund are specified in Section 7 (c) of the Appendix.

- 10. Fees and Expenses - The Trustee shall collect from the Fund trust fees in the amount equivalent to one percent (1.00%) per annum based on the NAV of the Fund, net of taxes. The said fees shall accrue daily and shall be collectible from the Fund on a monthly basis.

For purchase and/or sale of the units of the Target Fund, including in the case of switching of the Target Fund, expenses such as but not limited to brokerage commission, early withdrawal charges, switching fees, sales load, or any other transaction costs payable to third party/ies shall be borne by the Fund. ### C. Investment Risks

- **Market Risk-** Prices of securities may go up or down in response to changes in economic conditions, interest rates and the market's perception of securities which in turn may cause the value of Units to rise or fall. Furthermore, some of the markets or exchanges on which a Fund may invest may prove to be illiquid or highly volatile from time to time and this may affect the price at which the Fund may liquidate its positions to meet realization requests.
- **Foreign Exchange and Currency Risk-** Fluctuations of the exchange rates between the Fund currency or Class currency and the Portfolio Currency may affect the value of the relevant Units. The foreign currency exposure of the Fund or any Class of the Fund may be hedged and may adopt an active or passive currency management approach. However, the foreign currency exposure of a Fund or Class may not be fully hedged depending on the circumstances of each case. Such circumstances include but are not limited to the outlook, hedging costs and market liquidity of the relevant currency.
- **Foreign Market Risks (includes emerging markets)-** Investments in foreign markets may present risks not typically associated with domestic markets. These risks may include changes in currency exchange rates; less-liquid markets and less available information; less government supervision of exchanges, brokers, and issuers; increased social, economic, and political uncertainty; and greater price volatility. These risks may be greater in emerging markets, which may also entail different risks from developed markets.
- **Issuer Specific Risk-** A security issued by a particular issuer may be impacted by factors that are unique to that issuer and thus may cause that security's return to differ from that of the market.
- **Counterparty Risk-** A Fund is exposed to the risk that a counterparty may default on its obligations to perform under a particular contract. If a counterparty becomes bankrupt or insolvent, a Fund could experience delays in liquidating an investment and may therefore incur significant losses, including losses resulting from a decline in the value of the investment during the period in which the Fund seeks to enforce its rights. The Fund may also be unable to realize any gains on the investment during such period and may incur fees and expenses to enforce its rights. There is also a risk that counterparty contracts may be terminated earlier due to, for instance, bankruptcy, supervening illegality or change in the tax or accounting laws relative to those laws existing at the time the contracts were entered into.
- **Taxation Risk-** Investments may be adversely affected by changes in taxation, monetary and fiscal policies. New taxes imposed on the holding of investments in a particular jurisdiction, or any capital gains or income derived from such investments, may adversely affect the performance of such investments and consequently the value of Units and the income from them.

- Equity Risk- A Fund's investments in stocks and other equity securities are subject to market risks that historically have resulted in greater price volatility than that experienced by bonds and other fixed income securities. This in turn may affect the value or volatility of the relevant Fund.

## RISK DISCLOSURE STATEMENT

Prior to making an investment, BPI Wealth is hereby informing you of the nature of investments and the risks involved in investing therein. As investments generally carry different degrees of risk, it is necessary that before you make any investment, you should have:

- Fully understood the nature of investments and the extent of your exposure to risks;
- Read this Risk Disclosure Statement completely; and,
- Independently determined that the investment is appropriate for you.

Enumerated and defined below are the various risks you are normally exposed in investing depending on the type of the underlying assets of the portfolio. BPI Investment Funds do not provide guaranteed returns and are not covered by the Philippine Deposit Insurance Corporation (PDIC).

There are risks involved in investing in BPI Investment Funds because the value of your investment is based on the Net Asset Value per Unit (NAVPU) of the BPI Investment Fund which uses a marked-to-market valuation and therefore may fluctuate daily. The NAVPU is computed by dividing the Net Asset Value (NAV) of the BPI Investment Fund by the number of outstanding units. The NAV is derived from the summation of the market value of the underlying securities of the BPI Investment Fund plus accrued interest income less liabilities and qualified expenses.

**INVESTMENT IN BPI INVESTMENT FUNDS DOES NOT PROVIDE GUARANTEED RETURNS EVEN IF INVESTED IN GOVERNMENT SECURITIES AND HIGH-GRADE PRIME INVESTMENT OUTLETS. THE PRINCIPAL AND EARNINGS FROM YOUR INVESTMENT CAN BE LOST IN WHOLE OR IN PART WHEN THE NAVPU AT THE TIME OF REDEMPTION IS LOWER THAN THE NAVPU AT THE TIME OF PARTICIPATION. GAINS FROM THE INVESTMENT IS REALIZED WHEN THE NAVPU AT THE TIME OF REDEMPTION IS HIGHER THAN THE NAVPU AT THE TIME OF PARTICIPATION.**

*Your investment exposes you to the various types of risks enumerated and defined hereunder.*

### **Interest Rate Risk**

There is a possibility that an investor may experience losses due to changes in interest rates. The purchase and sale of a debt instrument may result in a profit or a loss because the value of a debt instrument changes inversely with prevailing interest rates.

The Fund's portfolio, being marked-to-market, is affected by changes in interest rates thereby affecting the value of fixed income investments such as bonds. Interest rate changes may affect the prices of fixed income securities inversely, i.e., as interest rates rise, bond prices fall and when interest rates decline, bond prices rise. As the prices of bonds in a Fund adjust to a rise in interest rate, the Fund's market value may decline.

### **Market/Price Risk**

There is a possibility that an investor may experience losses due to changes in market prices of securities (e.g., bonds and equities). The portfolio of a Fund is exposed to uncertain market values due to price fluctuations.

The Fund risks to lose value due to a decline in the prices of securities, which may sometimes happen rapidly or unpredictably. The value of investments fluctuates over a given time period because of general market conditions, economic changes or other events that impact large portions of the market such as political events, natural calamities, and other factors. As a result, the NAVPU may increase to make profit or decrease to incur a loss.

### **Liquidity Risk**

There is a possibility that an investor may experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is to be made at a loss. These may be caused by different reasons such as trading in securities with small or few outstanding issues, absence of buyers, limited buy/sell activity or an underdeveloped capital market.

There is liquidity risk when certain securities in the Fund may be difficult or impossible to sell at a particular time which may prevent the withdrawal/redemption until the Fund's assets can be converted to cash. Even government securities which are the most liquid of fixed income securities may be subjected to liquidity risk particularly if a sizeable volume is sought to be traded.

### **Credit Risk/Default Risk**

There is a possibility that an investor may experience losses due to a borrower's failure to pay the principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of security which the borrower issued. This inability of the borrower to fulfill its financial obligations may have resulted from adverse changes in its financial condition, thus, lowering credit quality of the security, and consequently lowering the price (market/price risk) which contributes to the difficulty in selling such security. It also includes risk of a counterparty (a party the Fund Manager trades with) defaulting on a contract to deliver its obligation either in cash or securities.

There is a risk that the Fund may experience a reduction in value in the securities which it has invested in, in the event the borrower defaults on its obligation or in the case of counterparty, when it fails to deliver on the agreed trade. This reduction in value of the Fund happens because the default/failure will cause the price of the security to decline and may make the security difficult to sell. As these happen, the Fund's NAVPU will be affected by a decline in value.

### **Reinvestment Risk**

There is a risk associated with the reinvestment of amounts in the Fund in view of the possibility of having lower returns or earnings when maturing funds or interest earnings are reinvested.

Investors who withdraw/redeem and realize their gains are exposed to the risk of generating lower returns if their funds are reinvested in an alternative investment outlet with lower yields. Similarly, BPI Wealth is faced with the risk of not being able to find alternative investments with equal or better yield as some of the securities in the Fund matures.

*In case of a foreign-currency denominated Fund or a peso-denominated Fund that is allowed to invest in securities denominated in currencies other than its base currency, the Fund is also exposed to the following risks.*

### **Foreign Exchange Risk**

There is a possibility that an investor may experience losses due to fluctuations in foreign exchange rates. The exchange rates depend upon a variety of global and local factors such as but not limited to interest rates, economic performance, and political developments.

The Fund is exposed to currency fluctuations when the value of investments in securities denominated in currencies other than the base currency of the Fund depreciates. Conversely, the Fund may lose value when the base currency of the Fund appreciates. The NAVPU of a Philippine Peso-denominated BPI Investment Fund invested in foreign currency-denominated securities may decrease when the Philippine Peso appreciates.

The returns of a foreign currency-denominated Fund invested in foreign currency-denominated securities may decrease when converted or translated in Philippine Pesos when the Philippine Peso appreciates.

### **Country Risk**

There is a possibility that an investor may experience losses arising from investments in securities issued by/in foreign countries due to the political, economic and social structures of such countries. There are risks in foreign investments due to the possible internal and external conflicts, currency devaluations, foreign ownership limitations and tax increases of the foreign country involved which are difficult to predict but must be taken into account in making such investments.

Likewise, brokerage commissions and other fees may be higher in foreign securities.

Government supervision and regulation of foreign stock exchanges, currency markets, trading systems and brokers may be less than those in the Philippines. The procedures and rules governing foreign transactions and custody of securities may also involve delays in payment, delivery or recovery of investments.

For complex investment products, investment instruments can be subject to sudden and sharp falls in market value which may cause a TRUSTOR to lose the entire investment and extra funding may be required, as necessary.

**Index-Tracking Risk**

Specifically for index-tracker investments, there is a risk that the Fund's portfolio may not be the same as, and/or may not achieve a high degree of correlation with, the return of an index because of operating and other fund-management related expenses.

**Other Risks**

A Fund may be further exposed to the risk of any actual or potential conflicts of interest in the handling of in-house or related party transactions by BPI Wealth. These transactions may include parent/affiliate-bank deposits; purchase of own-institution or affiliate obligations (stocks, mortgages); purchase of assets from or sales to own institution, directors, officers, subsidiaries, affiliates or other related interests/parties; or purchases or sales between fiduciary/managed accounts.
